REGAIN THE GLOW ON YOUR LIPS

Lips are very sensitive to touch, warmth, and cold. The skin of the lip, with three to five cellular layers, is very thin compared to typical face skin, which has up to 16 layers, so it requires special attention and extra care.

Lips are also a tactile sensory organ and one of the key parts of the face harmony. It contributes substantially to facial expressions like a smile, sadness or joy.

Moreover, the lips are a symbol of sensuality and sexuality which highly influence the attractiveness and confidence of a person. Full lips, symmetric/proportional with nice curves and healthy color are considered aesthetically appealing.

A rough estimation indicates that 70-75% of HA fillers injected nowadays are for lip augmentation/volume and lip contouring.

Restoring the shrunken soft tissue or remodeling the lips' shape, with hyaluronic acid will give the lips a natural volume and color.

“A SMILE IS GORGEOUS WITH **GLOWING LIPS**”

My Filler Glips is the first product of **My Filler** range completely dedicated and exclusively made for any lip treatment, such as volume and contouring.

My Filler Glips special formulation was created taking into consideration all those differences: biological, structural, color, shape, and volume. Its purpose to provide an immediate and long-term solution at the same time fulfilling the patient’s desire and expectations.

The cross-linked hyaluronic acid gel solution based on **TRIO Technology** gets boosted with an extra 5 mg/ml of a non-cross linked hyaluronic acid gel, making **My Filler Glips** one step ahead.

Simple addition which makes a big difference...

The non-cross linked hyaluronic acid immediate gets in action and brings the desired skin effect in zero time. It starts as soon as the material is injected. Unfortunately, the NCLHA action is limited on time (normally 5-7 days) but that is enough time for the cross-linked hyaluronic acid settles and gets in function filling the space left correcting the unaesthetic defect.

Code	Cross-linked HA Concentration	Non-cross-linked HA Concentration	Volume	Duration
MYF005	20 mg/ml	5 mg/ml	1 syringe of 1 ml	6-9 months

My Filler Glips package contains: 1 sterile prefilled syringe 1 ml, 2 pcs of 27G 1/2” needle, 2 product labels, multilanguage instructions of use and 1 Patient Card.

Epiration period: 30 months.
